Entrepreneurship Skill Development Program on 'Agentic Artificial Intelligence for Self-Employment' Launched at Satya Institute of Technology and Management (SITAM)

Vizianagaram | 13 February 2026

A two-week Entrepreneurship Skill Development Program on the theme "Agentic Artificial Intelligence for Self-Employment" was inaugurated at Satya Institute of Technology and Management (SITAM). The program is supported by the World Bank, the Andhra Pradesh Micro, Small and Medium Enterprises Development Corporation (MSME), and JNTU-Gurajada University.

The training program is being conducted by the Department of Computer Science and Engineering from February 13, 2026, to March 9, 2026.

Inaugurating the program, Trainer Mrs. Swarnalatha Kandregula stated that Agentic Artificial Intelligence represents the future direction of innovation and entrepreneurship. She emphasized the importance of entrepreneurial mindset, leadership skills, emotional intelligence, and ethical values, encouraging students to transform their ideas into impactful and socially responsible enterprises.

Director Dr. Majji Sashibhushana Rao noted that the program would enhance students' exposure to global technological advancements. He reaffirmed the institution's commitment to strengthening skill development and fostering an entrepreneurial culture.

Principal Dr. D.V. Ramamurthy highlighted that AI-driven training programs help bridge the gap between academia and industry requirements. He stated that such initiatives not only enhance employability but also nurture future job creators.

Dean of Research and Development, Dr. Prasuna V.G., remarked that the program promotes research-driven entrepreneurship. She encouraged students to develop AI-based solutions to address societal and industrial challenges.

Head of the Department of Computer Science and Engineering, Dr. G. Venumadhava Rao, stated that by equipping students with advanced AI technologies, the department is guiding them toward self-employment and startup creation
